The penetration of oil into surface inclusions of emeralds to improve it's overall appearance is a common practice of most emerald cutters. The oil should be clear in color and not color enhanced. We recommend that emeralds should not be submersed in an Ultra Sonic cleaner as this may draw out the oil and may reduce the quality of the emerald! Do not apply heat to emeralds!

A Quality: Deep to medium deep green, very well cut with slight inclusions to naked eye. The darker green stones will have more visible inclusions to naked eye but luster will still be very good. We stock mostly African. Top Columbian would be our A+ quality 30 to 35% higher than our 'A' quality! Call for price quote.

B Quality: Medium deep to medium green and well cut. Some loss of stones luster and transparency. Lighter green stones will be much more transparent and higher luster.

C Quality: Light to dark green and more translucent than transparent. Darker green stones will get more cloudy looking but still with some luster.(not opaque).

D Quality: Light to dark green and more translucent to opaque. Lighter stones will be quite cloudy with little luster, while darker stones will be close to opaque.

***We stock top quality stones in 1.0 to 2.5 carat sizes!**

A Quality: Top quality deep bright red to dark pinkish red and very lively (not too dark). Round stones up to 3.5mm are "diamond cut". Eye clean, very high luster.

B Quality: Red w/ pink overtones and good luster. The more red the stone, then the more included but still good luster. Pinkish/red stones are closer to eye clean.

C Quality: Pinkish/red or purple/red tones. These stones are more translucent to semi opaque. The more red the stone the more opaque it will be.

D Quality: Pinkish/red or purple/red tones. Mediocore cutting and very little life and mostly opaque or shallow poorly cut stones.

(We also stock ovals 2 to 5 carat sizes in A+ our gem quality)

A Quality: Very bright royal blue and very lively. Mostly Madagascar or Ceylon in origin. Top cutting, clean and transparent. Top quality Ceylon in two carat plus sizes are usually our A+ quality.

B Quality: Deeper blue than 'A' quality but still very lively and eye clean. Very good cutting and luster. Also some stock in medium/light blue Ceylon material.

C Quality: Dark blue(not black) that is still translucent and somewhat murky looking or a medium/light blue with gray overtones and slightly included.

D Quality: Almost black (with some blue) in color, almost opaque with mediocre cutting. Can sometimes be lighter blue/gray in color but poor cutting and some what shallow in depth.

A Quality: Deep Dark to medium dark purple, but not too dark. Very lively and high luster, clean and very good cutting.

B Quality: Medium dark purple. The darker stones will have reduced luster and medium light stones will have higher luster and clean. Good cutting.

C Quality: Medium light to light in color. The lighter the color the cleaner the stone in most instances.

LONDON: Is the darkest blue available. It is more of a steel blue color, with slight grey overtones. *We do not carry London in princess or checkerboard cut.
DARK SWISS: A deep dark but bright blue color. **Super Blue** is slightly more intense color and will be closer to 'london blue' prices (very limited availability).
LIGHT SWISS: This grade is slightly lighter than "dark swiss" but darker than "sky blue". Looks like very dark aquamarine color.
MEDIUM SKY: This grade looks the most like fine medium quality aquamarine.

  Fancy cuts available where above symbols are placed at slightly increased prices.

A QUALITY: Deep dark purple with slight bluish cast. Inclusions (if any) are eye clean. Top quality color and luster. Some stones might be cut a little deeper than normal to retain its deep dark color.

B QUALITY: Medium deep purple with bluish cast or a slightly darker stone but with more of a bluish cast than purple. Still very lively but with slight inclusions.

C QUALITY: Light purplish or bluish shades that can be more shallow cut than above qualities. Some zoning and inclusions may be more noticeable.

(SAME MILLIMETER SIZES IN TANZANITE WEIGHT CAN VARY CONSIDERABLY!)

A QUALITY: Very lively deep vivid pink or rubellite (redish) color. Mostly eye clean except for rubellite material, which are slightly more included but still very fine. Rubellite/Pink stones that are very clean or 'hot' pink color are A+ quality and very rare.

B QUALITY: Medium/deep pink color that are slightly more included than our 'A' quality. The darker the pink color then visible inclusions can be more noticeable.

C QUALITY: This is mostly light (baby) pink color, eye clean and well cut. Darker pink colored stones will have more of a slight brownish tone & mediocre cutting.

PLEASE COMPARE OUR "A" QUALITY & PRICE AGAINST ANY OTHER DEALERS TOP QUALITY!

BLACK OPAL: Available in limited shapes & sizes (mostly ovals)!

A+ QUALITY: Very intense broad flashes of color on white or jelly base. Considered "Gem Quality".

A QUALITY: Intense broad flashes of color on white or jelly base. Surface color can have a mix of reds, greens and some blues.

B QUALITY: Very good color, mostly broad flashes of color, but not as intense as our 'A' quality. Available in reds, greens and blues on a white base or jelly (with blue/green colors) base.

C QUALITY: White base with a slight tinge of reds, greens or mix of both. Also can be jelly base with some shades of blue/green.

D QUALITY: Mostly solid white base throughout the entire stone with a very slight noticable color of red or green.

ETHIOPIAN OPAL: Is more like a jelly opal with intense flashes of reds, greens and some blue. We stock larger sizes in ovals 10x8 & up. The prices are usually 45% less than top quality Australian opal.

OPAL DOUBLET CAB A: Has a thin genuine opal top with intense colors of mostly blue/green and a genuine brownish matrix bottom. Both pieces are expertly glued together to look like genuine opal! The color comes from the opal and not the glue.

OPAL TRIPLET CAB A: The top cab portion of the opal is a clear transparent opal quartz. The bottom portion is black onyx. Both pieces are glued together with a 'colored cement' in the center to give the top portion the appearance of fine opal.

OPAL SIMULATED CAB A: Man made substance that 'simulates' the look of very fine black and white opal. We carry intense blue/green or red/blue/green both with a blackish matrix for the base or intense red/green with a white matrix base.

Cultured White Full Round Pearl (Half & Full Drilled)

AA Quality: Excellent luster - little to no surface blemishes with a very slight rose/pink color. Almost perfect round. Top Quality Japanese Akoya (Salt Water) Pearl. (Limited Availability-If not available we will substitute A quality below)

A Quality: Excellent luster - little to no surface blemishes with a very slight rose/pink color. Top Quality Chinese Akoya pearl or High quality Japanese Akoya Pearl.

B Quality: Good luster white to cream color. Nacre layer thinner than "A" quality with some slight surface blemishes. Very fine quality Fresh Water or medium quality Salt Water pearl.

C Quality: Loss of luster. Nacre layer thinner which causes the pearl's luster to wear out much faster. Mostly Chinese Fresh Water pearls of medium quality. These can be slightly off round in this quality.

(Some smaller size South Sea Pearls may be 1/2 drilled)

AA Quality-Fine Bright White: Thick nacre layer which brings out an excellent luster. They are 'full' round. all natural & untreated.

A Quality-Light Creamy White: Nacre layer slightly thinner so there will be a slight loss of luster. Slightly more blemishes than our 'AA' quality.

AA Quality-Fine Gray: Deep rich gray color and thick nacre layer with high luster. Very few blemishes and full round.

AA Quality-Fine Golden: A deep rich golden yellow color. Thick nacre layer and very high luster. Full round with very few blemishes.

Cultured Gray/Black Full Round Pearl (Half Drilled)

AA Quality: (Peacock/Black) Limited Quantity! Top quality dyed greenish black Japanese Akoya pearls. Very high luster.

A Quality: (Gray/Black) Top quality dyed Chinese Akoya pearls darker gray/black with a tint of dark green or red. Very high luster.

B Quality: (Gray/Black) Mostly dyed Chinese Fresh Water pearls, medium gray color with loss of luster and some very slight surface blemishes.

C Quality: Silver/Gray color. Good luster, some very slight blemishes.

* **Pulled/Floating Method:** This method is an inexpensive process used for many years in creating corundum but recently has also been used to create alexandrite at a much higher cost. The crystalline structure will have curved striations within the stone at high magnification.

* **Hydro-Thermal Method:** These crystals take from one to three months to grow, and are formed into a 'boule' cylinder of created rough emerald. Our Hydro emeralds produce a darker 'Zambian' look and we also carry a beautiful 'Columbian' emerald looking stone (available in many sizes)!

* **Flux Method:** This method is more expensive and the crystals take from three to six months to grow (We do not stock this type).
